Aim and Scope

The Korean Society of Exercise Physiology (KSEP; http://www.ksep.kr) was founded in 1988 and currently has around 2,000 members. The Exercise Science (Exerc Sci), an official journal of the KSEP, was first issued in 1992 and currently has published 28 volumes. The aim of the Exerc. Sci. is to scientifically show the "scientific and clinical value of exercise in health and disease control", provide evidence for this, consequently promote the development of elite sports, and improve the health of the general public. Therefore, Exerc Sci focuses on evidence-based scientific research of multidisciplinary studies, including physiology, biochemistry, nutrition, metabolism, genetics, immunology, medicine, rehabilitation, growth and development, training, anthropology, and epidemiology related sport, physical activity, and exercise. The types of manuscripts include research articles, reviews, short/rapid communications, and case reports in the field of exercise science. For internationalization, we operate a separate "full English journal homepage" and a "submission evaluation system". The Exerc Sci is an international, double-blind peer-reviewed and open access journal published quarterly (February 28, May 31, August 31, and November 30). Full texts are freely available from https://www.ksep-es.org. The Exerc Sci is also partially supported by The National Research Foundation of Korea (NRF).
CONTENTS

Volume 32 Number 1 February, 2023

Editorial
1 A New Leap Forward of Exercise Science - What Should We Do?
Changsun Kim

Review Articles
3 Menopause Induces Physical Inactivity through Brain Estrogen Receptor and Dopamine Signaling
Nyeonju Kang, Dong-II Kim, Young-Min Park
11 Application of a NIRS Neuroimaging Method to Elucidate Neural Mechanisms of Exercise-cognition Interaction
Kyeongho Byun
21 Effect of Exercise on Sleep in the Middle-aged and Older adult: A Systematic Review and Meta-Analysis of Randomized Controlled Trials
Hong-Bum Eun, Seung-So Baek

Original Articles
33 Effects of Aquabike Exercise on Gait Ability, Cardiovascular and Fall-related Fitness in Older Women with Obesity
Chae-Bin Lee, Seung-So Baek
41 Analysis of the Relationship between Physical or Mental Problems and Health Maintenance Methods by Personal Differences
Jeoung A Kwon, Taeyeon Oh, Kisung Kwon
53 The Effects of Plyometric Training with Elastic Band on Physical Fitness and Isokinetic Function of Fencing Foil Athletes
Byung-Su Kim, Jin-Seok Lee
63 The Comparison of Physical Fitness Factors between Korea Water Polo National-team and Reserve-team Athletes
Yuezhu Zhou, Changsun Kim, Seungjae Lee, Seokki Min
73 Comparison of Differences in Thigh Muscle Morphology and Function according to Post-anterior Cruciate Ligament Surgery Period
Hyung-Pil Jun, Eunwook Chang
83 The Differences of Shoulder Range of Motion and Dynamic Stability in Upper Extremity Depending on Ages and Experiences of Shoulder Injuries among Volleyball Players
Young Hoon Kim, Taegyu Kim, Eunkuk Kim, Jong-Chul Park, Hokyung Choi
CONTENTS

Volume 32 Number 1 February, 2023

92  Combined Effects of Treadmill Running and Vitamin D administration on Skeletal Muscle Morphology and Mitochondrial Dynamics in HFD-induced Obese Mice
    Jinyeub Nam, Jinkyung Cho, Taewan Kim, Hyobum Kwak, Hyunsik Kang

100 Effects of Limiting the Number of Ball Touches on Physical and Technical Performance of the Junior Football Players during Small-sided Game
    Namyoung Kim, Sewon Lee, Kyeongho Byun

111 Influence of Physical Activity Level on Cardiovascular and Autonomic Nerve Function
    Shin-Young Park, Jin-Su Kim, Seungho Lee, Ruda Lee, Eui-Young Lee, Moon-Hyon Hwang
